SUMMARY

BCA graduate and software developer with hands-on experience building web and desktop applications. Developed and tested a multi-tenant Warehouse Management System and contributed to an RFID-based retail checkout system using Python and PyQt6. Interested in full-stack development, application engineering, databases, and practical problem solving, with a focus on building reliable and user-focused software.

EDUCATION

Hindustan Institute of Technology and Science | Bachelor of Computer Applications (BCA) | 2023–2026 | CGPA: 8.05 / 10

EXPERIENCE

Chennai Port Authority | Intern | 17-day Internship

HTML, CSS, JavaScript

- Developed a web-based Port Charges Calculator for official port tariff calculations.
- Implemented JavaScript calculation logic for demurrage and container storage charges.
- Developed PDF export functionality for structured calculation results.
- Built and refined the interface using HTML, CSS, and JavaScript.

PROJECTS

Warevo | *Multi-tenant Warehouse Management System*

React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Vitest | warevo-three.vercel.app

- Developed and tested a multi-tenant WMS for warehouse operators, staff, accountants, clients, and platform administrators.
- Built frontend features with React and TypeScript and maintained application navigation using React Router 7.
- Designed database schema and migrations in Supabase/PostgreSQL for users, inventory, orders, invoices, and tenant data.
- Implemented Supabase authentication, RBAC, and Row-Level Security for tenant-aware access control.
- Developed inventory and order workflows, invoice functionality, Vitest tests, and deployed the application on Vercel.

SmartCheckout | *RFID-Based Retail Billing & Administration System*

Python, PyQt6, MySQL, RFID, PyInstaller

- Contributed to an RFID-based desktop POS and inventory management system for automated product identification and checkout.
- Worked on RFID integration, processing tag identifiers and mapping scanned products to MySQL product records.
- Developed PyQt6 GUI components for the checkout application and contributed to database-backed checkout workflows.
- Implemented administrative password hashing using PBKDF2-HMAC-SHA256 to avoid storing plaintext passwords.
- Worked within a layered architecture separating the presentation, business logic, and database layers.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS

Frameworks: React, React Router 7, Vite, Tailwind CSS, PyQt6, Flutter

Backend & Data: Supabase, PostgreSQL, MySQL, Firebase, REST APIs, RPC

Security & Testing: Supabase Auth, RBAC, RLS, PBKDF2-HMAC-SHA256, Vitest, unittest

Tools & Deployment: Git, GitHub, Docker, Linux, Vercel, Firebase Hosting, PyInstaller

Hardware: RFID, ESP32, ESP8266, PN532, MFRC522

LEADERSHIP & ACHIEVEMENTS

- Contributed to organizing TECH BLAZE, a technical symposium at Hindustan Institute of Technology and Science, supporting planning, coordination, and event execution.

CERTIFICATIONS

Python — GUVI | HTML & CSS — GUVI | JavaScript — GUVI
